

Asia Pacific

Orientation Center

Hello From Asia Pacific!

There are many steps missionaries go through in preparation to plant a growing thriving church. Attending the Bible Institute and then moving onto the Missions training centre are part of these steps. As you know, learning is a continuing journey. Walking along side new missionaries as they begin the process of learning a new culture and language is the first step of on-the-field training for a new missionary. In Asia Pacific, the building we call the Orientation Centre has been the location that facilitates this stage of learning ministry. It has been used as the centre of the program for on-field training since 2003. For the ten years prior to that, it was used by Ethnos as a dorm for children of missionary families attending a local international school.

About this project

Since becoming the base for the current program, this building has been used as a meeting place for over 100 families over many years. It has been used for orientations, Bible studies, Praise & Prayer times, workshops and various get-togethers. It is large enough to allow children to play inside (or outside) while their parents meet together to learn about language & culture, pray together and worship together.

It has made a big difference for these families to have a place like this to come to for their training & fellowship times during their first year or two on the field. Many of these families are now in long term ministry roles on the field such as serving on church-planting teams, Bible translators, language consultants, supply buyers, pilots, teachers, etc.

Until recently, renting this facility to house the Orientation Centre was the best option; however, with an increase in rental rates, that is no longer the case. The owner is wanting to sell the property and no longer rent it. Purchasing the current property where it is located, is what we feel is the best option. It is difficult to find property in this area large enough to fit the needs of the ministry it is used for. Our hope is that the Lord provides the needed funds to buy the current property.

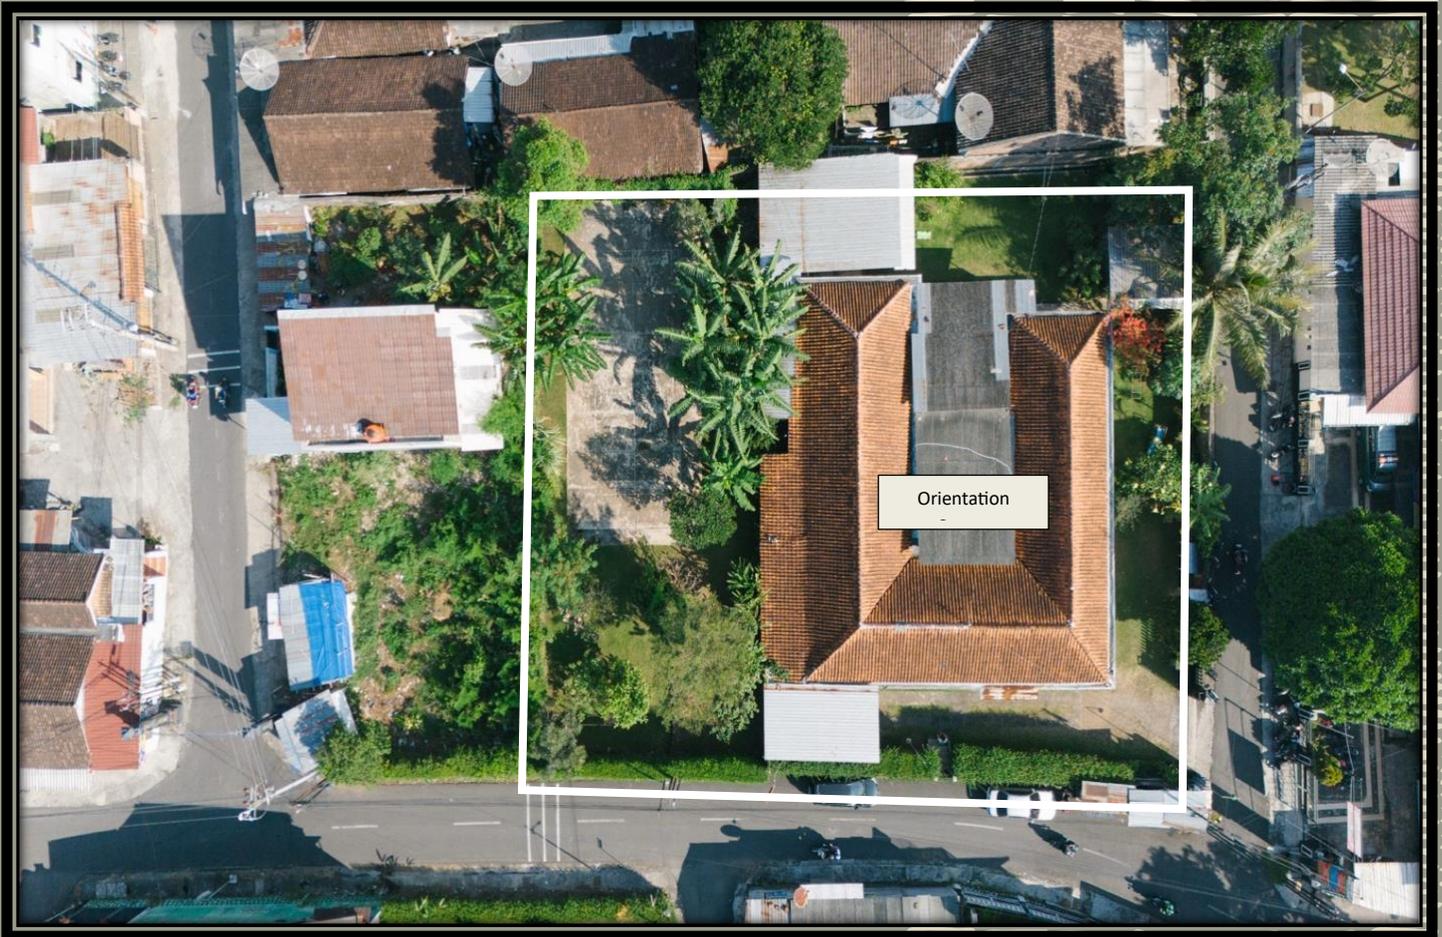

Amount Needed

\$524,806

We are relying on the Lord to raise the funds by

December 2027.

How you can help . . .

Giving to the Asia Pacific Orientation Centre Project will allow for the purchase of the property that has & will accommodate the needs of missionaries serving in Asia Pacific. Having a permanent, affordable and accommodating location that will serve as a “hub” for their on-field-training will better enable Asia Pacific missionaries to focus on their greater purpose, reaching the unreached with the hope of Jesus Christ.

Pray This is a huge project, and we can rest in knowing that the LORD hears & answers our prayers!

Share Share this project with your church, family & friends. We can use all the help we can get!
